Workers' Eyesight

Only those with perfect sight can do perfect work. The skilled worker, therefore, has vital need of good sight. It behooves him to care for it--to preserve his skill. Good sight has a cash value because it effects the quality of a person's work, and also because imperfect sight means imperfect health. Many nervous disorders are due to defective sight--and all skill quickly deteriorates when the nerves are affected. If you are a skilled worker, do not take for granted the condition of your eyes. Have them tested. If they are right, well and good; but otherwise you should take steps and avoid trouble by having your eyes properly fitted. My 33 years of practice will always be at your service. I don't use drugs or drops in making examinations as they are dangerous.

This Important Silk Sale

Continues Tomorrow

For Three Days Beginning Monday--Grades Worth up to \$2.25, Special 98c Yd.

We call this an important sale because it should be a very unusual event with all women who appreciate great silk values. Owing to the upward trend of silk prices we could not possibly buy these for considerably more than we are asking for them. Anyone familiar with the silk market will tell you that this is so. These Silks are in odd lengths and that is why we wish to close them out--just the thing for Waists, Dresses, Underskirts, etc., in the season's wanted stripes, checks, plaids, etc. We cannot cut these--sold in lengths as they are, 2 to 7 yards--36-inches wide.
